THE QUALITY PAINT

Paint Product Range

**APPLY WITH CONFIDENCE**

THE WITHAM GROUP

Manufacturers of Quality Lubricants & Paints Since 1921

Trading since 1921, Witham Oil and Paint Ltd is a privately owned family run business with its Head Office and lubricant manufacturing based in Lincoln. We also have trade and decorating distribution depots in Lowestoft, Suffolk and Soham, Cambridgeshire. The business is today collectively known as The Witham Group.

### Company Profile

We are extremely proud of our heritage. Over the past 95 years our family run business has grown from humble beginnings originally making cycle oil and candle wax, to become acclaimed manufacturers of a huge range of commercial lubricants and paints.

### Today the Witham Group:

- Supplies and distributes in excess of 400,000 litres of Paint each year
- Blends 5 million litres of oil each year
- Distributes over 20,000 deliveries each year
- Has customers throughout the UK and abroad
- Recommended lubricant partner to the largest agricultural buying groups
- Works hard to improve the standards of the oil and lubrication industry
- Members of:    

We provide our vast range of reputable products to an enormous range of customers. Specialising in agriculture, automotive, haulage and motorsport industries, we also supply many other markets such as engineering, plant machinery, race circuits and pipework producers, all with reputable lubricants, greases, paints and coatings, anti-freeze and many other ancillary products.

Royal Warrants have always been regarded as demonstrating very high standards in personal service, quality, excellence and innovation within each respective industry. Companies can only reach that status through careful and efficient management. There are around only 850 Royal Warrant Holders in the world representing companies from a huge cross section of trade and industry. They range from traditional crafts people to global and international firms operating at the cutting edge of technology.

Witham Oil and Paint Ltd are extremely proud to have been awarded the Royal Warrant for the goods and services we supply to HM The Queen. The Royal Warrant helps underline our company's commitment to maintaining and building its reputation as producers of the finest quality lubricants and paints. As members of the Royal Warrant Holders Association, we are united and committed to the highest standards of service and business excellence.

### Woco

Woco is the Brand name for our own range of quality paints and coatings and signifies true expertise and quality. Our tried and tested developed products are made from high quality raw materials and are continually tested to the highest international standards to give customers the ultimate reliability on every application.

We manufacture and supply one of the largest ranges of industrial paints and coatings in the UK to suit all sectors of business and trade use. Specialising in industrial applications, floor paints and woodcare products, we can also supply paints and coatings from a variety of market leading manufacturers such as:

As colour choice is so important to the customer and a high quality finish is expected every time, preparation is key. We can tint paints to customers' requirements in all decorative finishes, as well as offering other decorative materials, cleaning products, preparation and application equipment. "Our unique paints and coatings range is designed to offer to the trade both reliable, quality products with in stock availability all under one roof".

Our independence gives us the refreshingly personal and long term approach to customers. We have been supplying and giving advice on paint products for over 95 years and are proud that our service, technical support and flexibility on deliveries and order times are second to none.

## PAGE 4 - 5 Our Service to You

A summary of how we feel about our customers and the communities in which we operate. A reminder also of the quality materials, technical support and own labelling opportunities that we provide.

## PAGE 6 - 7 Working with the Environment

A look at how we are totally committed to ensuring that our products, packaging, manufacturing processes and distribution methods minimise the effect on the Environment wherever possible.

## PAGE 8 - 9 Our Paints and Coatings

Here you will find some background of how our products can be applied with useful easy to read icons. Choose which size of paint you require and find out details of the colour ranges on offer.

## PAGE 10 - 11 Industrial & Machinery Paints

A range of topcoats for metal and machinery for use over our wide range of primers and undercoats that provide the ultimate finish and protection as well as appearance.

## PAGE 12 - 13 Industrial Undercoats and Primers

A unique range of strong, reliable undercoats and primers including, quick drying, water based, zinc free and products providing exceptional weather resistance.

## PAGE 14 - 15 Woodcare & Joinery Coatings

All you will need for your sheds, conservatories, fencing, doors and windows. This range provides outstanding protection from the elements and long lasting colour with a choice of finishes.

## PAGE 16 - 17 Floor and Line Marking Paints

Floor paints and identification paints designed for hard wearing areas, workshop floors, showrooms, concrete surfaces, parking bays, sports tracks and tennis courts, roadways and much more.

## PAGE 18 - 19 Decorative Paints

Durable products for interior and exterior masonry and wood, including top quality emulsions, details of our colour matching service and other premium brand products.

## PAGE 20 - 21 Marine & Anti-Fouling Paints

From fishing fleets to leisure craft we have heritage approved, hard wearing marine paints that provide heavy duty, anti-fouling, non-slip coatings helping resistance to salt water and diesel fuels.

## PAGE 22 - 23 Specialist Paints & Coatings

A variety of specialist paints for particular applications and finishes such as swimming pools, heat resistant surfaces, anti-condensation areas and model paint to name but a few.

## PAGE 24 - 25 Equestrian Paints

Designed to enhance the longevity, appearance and protection of all interior and exterior finishes for the horse racing, livery and equine industry.

## PAGE 26 - 27 Ancillary Products

We also provide all you need to help create the Perfect Finish. A wide range of brushes and rollers, preparation tools and equipment, thinners and cleaning products.

## PAGE 28 - 29 Helpful Hints

Preparation is the key to all successful paint and coating applications. Here are some really useful tips on the preparation and sensible disposal of products.

## PAGE 30 - 31 The Quality Lubricant

For over 95 years we have also manufactured and distributed industrial and commercial lubricants and greases. Specialising in agriculture, automotive, haulage and marine industries, we supply quality and reliable products throughout the UK and abroad.

## Our Service to You

The Witham Group is so proud of its heritage and the emphasis it places on the service to all of our customers, whether old or new, big or small. Having recently celebrated over 95 years of trading, we know the importance of having firm standards of operations in place as the cornerstones of a good business and supporting those that work for us and those in our communities.

### Personal Approach to Business

As a family business, our excellent paints and coatings are at the heart of our business, but we believe that there is much more to it than that.

We run our business based on trust, honesty and by having a personal approach to all our customers no matter what their query or order is. In the early years this was how we grew our business from a small paint manufacturer in Lowestoft, to become one the UK's largest independent paint suppliers across the UK.

Whether our paint is used on a lorry or tractor, bus or car, boat or gate, racetrack or factory floor, to us each job is important and we are extremely proud of our paint wherever it is applied.

With that pride, comes a responsibility and a genuine care of the products we supply. We have an extensive level of knowledge and expertise with a portfolio including wet paint, powder coatings and aerosols covering virtually every type of surface imaginable.

### Technical Support

Backed by years of experience in providing paints and coatings for industries including; industrial, woodcare and joinery, floor and line marking, decorative, marine and anti-fouling, equestrian, and many other specialists' products, we offer market leading technical support to our customers.

We also understand that technical support begins before the paint is even applied, Our Technical Support team includes specialists in all areas including:

- Application evaluation and help with finding the right product for the job
- Pre-treatment effectiveness
- Avoidance of waste
- Cleaning
- Problem solving

### Trade Shops

We have 3 Paints Shops throughout the UK, Lowestoft, Soham and Lincoln where our team of experts can offer advice on products and associated sundries depending on the job you are undertaking. From professional tradesmen, handymen, to DIY enthusiasts & high end vehicle refinishers our staff will help with your queries and order. Our website also provides information on our paint range and also has lots more products available including spray guns, brushes, knives, masking tapes, decorating materials & safety clothing.

### Own Label Products

For many years now we have been able to offer a specialised "Own Label" packaging and labelling service for customers who wish to sell their own brand of paint. Using our in house graphics and design team, we can help businesses and distributors market their own products which have the quality manufactured Witham product behind them.

### Hallmark of Quality

We are proud to be accredited with the British Standard EN ISO 9001. This ensures our entire manufacturing and distribution processes meet the highest standard and provides assurance that the way we do business is recognised as good practice.

FM 37897 ISO9001

*"We pride ourselves on our long standing relationships with many of our customers and we look forward to maintaining them for many more years to come".*

**WOCO**  
Paint Product Range

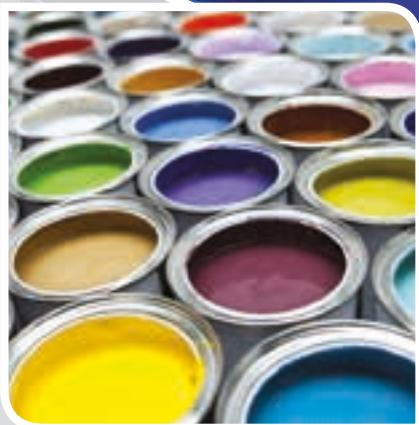

#### Show Time

As a way to say "thank you" to our customers and contacts we invite them to our stand each year at the various county shows. With exciting exhibits from the world of vehicles and machinery, we try to make our stand interesting and fun, whilst offering refreshments, friendly hospitality and a chance to catch up with customers old and new. We attend the Suffolk, Lincolnshire and Royal Norfolk shows each year, along with the relevant Agricultural Trade shows, LAMMA and Cereals, as well as other local events where we ensure prospective customers get the chance to find out what we do and how we can help them.

#### Community Support

For many years now The Witham Group has supported a variety of local causes and charities. In particular we have worked hard to raise thousands of pounds for the Lincolnshire and Nottinghamshire Air Ambulance, along with many other national and personal causes close to the hearts of our staff and their families.

From lawnmower races to speedboats, motorbikes to cycling events, we have sponsored customers and colleagues keen to raise money for good causes, using our oil or paint products.

# Working with the Environment

Despite the vast quantity of different products being manufactured and distributed by The Witham Group, our aim is always to operate within a climate of excellence. Not only in terms of service and procedures for customers but also for systems of product manufacture, the welfare and health and safety of all our employees and those affected by our activities and the Environment.

Oil and Paint production traditionally works within an industry where the use of additives, chemicals and energy is essential to the manufacturing process. However, the Witham Group is totally committed to ensuring that wherever and whenever possible, our activities including raw material purchasing, manufacturing and distribution, waste generation and disposal, and solar panel installation all help minimise the effect on the environment.

Paints and Coatings perform a positive environmental function in protecting and decorating surfaces. They are used to preserve timber and enable us to use less precious hardwoods and replace them with renewable-forest soft woods, which would otherwise be unsuitable for construction purposes. Coatings also save valuable metals like steel and aluminium, and the fuel needed to make them, by preventing corrosion.

However, decorative coatings have an impact on the environment at each stage in their life cycle-during production, during application and during disposal. The two biggest environmental effects associated with coatings are the emission of Volatile Organic Compounds (VOCs) and the disposal of surplus materials.

In recent years the demand for a safer, cleaner environment has led to the drive to limit the amount of VOCs allowed in coating products and reducing these limits over the coming years. In addition, the development of new alternative low VOC products and clear labelling of VOC content of each decorative product are all helping to protect consumers and the environment wherever possible.

No decorative coating is entirely environmentally friendly and some high gloss paints, aerosols and some other specialist paints in particular need higher VOC levels for performance and, at present, there is no low VOC substitute for these. However, water based products generally contain lower levels and are much more easily available along with low solvent products.

The Witham Group ensures it complies with the relevant environmental legislation and industry codes of practice as a minimum level of performance. In addition we continually strive to reduce the use and cost of energy, water, packaging, paper and fuel and actively encourage and promote recycling, waste reduction and pollution control throughout our group of companies.

*"Our aim is to operate with corporate care and social responsibility. We recognise that promoting sustainability and protecting the environment is of the utmost importance, not only for the here and now, but for the future of us all and our families".*

*Nigel Bottom, M.D.*

## Our Paints & Coatings

For over 95 years now we have manufactured and distributed our own range of paints and coatings throughout the UK and to a huge range of customers and applications. Understanding how important it is to get quality paints and products that can be relied on, delivered on time and give the right finish is what we do best.

### WOCO TRADE PAINT

Witham's Woco Trade is our premium quality professional paint brand and is widely used by contractors, manufacturers, agricultural suppliers, decorators and builders. It is specified for use in domestic and commercial environments for customers looking for quality, colour choice and market leading advice and service.

***We offer a complete range of up to date products of proven premium quality for every decorating situation or maintenance requirements such as floor paints and wood coatings.***

Our range of durable quality paints and coatings are thoroughly developed products, made from high quality raw materials and are continually tested to give customers the ultimate reliability on every application.

### APPLICATION METHODS

All our products are individually designed for use on different surfaces and different applications and can be applied using a range of methods including, brush, roller, conventional and airless spray applications.

ROLLER

BRUSH

SPRAY

AIRLESS SPRAY

*In this brochure all the paints and coatings are listed with the appropriate application.*

## LEADING BRANDS

We appreciate the importance of choice to a customer and also using the right product for the right job. That is why we can also supply paints and coatings from a variety of market leading manufacturers such as:

## PREPARATION IS KEY

As every professional knows, "preparation is key" when it comes to achieving the best paint finish. We provide everything you need for the preparation and cleaning of surfaces as well as a wide choice of application equipment such as professional use brushes, rollers and sprayers.

*In addition we offer a range of protective workwear, thinners and aftercare products for all types of requirements.*

## TECHNICAL DATA SHEETS (TDS)

Listed below every paint product is its Technical Data Sheet number for easy reference. TDS Sheet is a document that summarises the performance and other technical characteristics of a product as well as a full description.

Our TDS sheets provide vital information such as drying times, covering capacity, which substrates are suitable for application as well as the product's properties and other crucial technical information as well as the benefits of the product. If you would like any TDS sheets sending simply contact us for further assistance.

We also provide fully compliant Safety Data Sheets (SDS) with every purchase. SDS are key documents in the safe supply, handling and use of chemicals. They should help to ensure that those who use chemicals in the workplace do so safely with no risk of harm to users or the environment.

## POWDER COATING

Powder coating is a type of dry coating which is applied as a free flowing dry powder. The coating is applied electrostatically and is then "cured" under heat to allow it to flow and form a skin. It is used to create a hard finish that is tougher than conventional paint. Powder coating is used mainly on metals such as galvanised steel, aluminium, car and vehicle parts. With many environmental advantages our powder coating paint is available in a variety of colours.

## TECHNICAL SUPPORT

Whether the paint is needed for machinery, vehicles, pipework, gates, bridges, race tracks, conservatories, steel work, fencing or buildings, we have the reliable products to suit all needs.

Importantly, we have the proven track record of a first class service from initial application advice through to speedy delivery and aftercare support. We also understand that technical support begins before the paint is even applied. Our Technical Support team are experienced in all areas including application, help with finding the right product for the job, quantity evaluation as well as advice on pre-treatments, avoidance of waste, cleaning and problem solving.

## WOCO COLOUR SPECIFICATIONS

These days colour choice is so important to the customer and a high quality finish is expected every time. With colour approval from hundreds of Original Equipment Manufacturers (OEM) we offer our paints in the full RAL, BS4800 and BS381C colour ranges. We can also "tint" paints to suit colours of individual choice and offer a bespoke colour matching service. We can tint paints to customers' requirements in all decorative finishes, be it gloss, vinyl matt, vinyl silk, eggshell, acrylic eggshell, mid sheen, scrubbable matt, or satin. For wood care and joinery products we stock the products that enhance and protect the beautiful appearance of wood and also provide outstanding paint products that are easy to apply for both internal and external use.

## BRITISH COATINGS FEDERATION (BCF) LTD

We are proud to be members of the BCF, a body which encourages industry best practices and helps drive international changes and improvements for individual paint, coatings, printing inks and wall coverings companies. The BCF also provide training initiatives and forums to ensure that members are kept up to date with industry requirements and the latest product technologies.

# Industrial & Machinery Paints

A range of topcoats for metal and machinery for use over our wide range of primers and undercoats that provide the ultimate finish and protection as well as appearance. Our range includes quick drying options as well as twin pack finishes all tested for reliability and performance.

## Single Pack

### Supercote Enamel Gloss Paint

A synthetic, fast drying, paint which exhibits a high gloss finish and offers excellent durability. This product has a wide range of uses but is particularly suitable for vehicle refinishing and industrial applications. Available in an extensive range of OEM, RAL, BS4800 and BS381c colours.

### Quick Dry Gloss Paint

A very quick drying finish paint, ideal for jobs requiring a fast turnaround. This product is great for plant, haulage and agricultural machinery where "down time" for maintenance needs to be kept to a minimum. Available in an extensive range of OEM, RAL, BS4800 and BS381c colours.

### Quick Dry Polyurethane Gloss Paint

This fast drying gloss offers excellent adherence and toughness, yet leaves a high level gloss finish. Resistant to oil and petrol, this is ideal for machinery and vehicle use. Available in an extensive range of OEM, RAL, BS4800 and BS381c colours.

### Black Bitumen Solution

A general purpose waterproofing coating for application to iron, steel, weathered galvanise and concrete. Turns matt on prolonged exposure to UV light.

### Metal Preservative Paint

A highly protective coating which is excellent for farm buildings, storage tanks and workshop facings. Available in an extensive range of OEM, RAL, BS4800 and BS381c colours.

### Zinc Phosphate Quick Drying HB Semi-Gloss Paint

This high performance coating is designed to dry under normal conditions within forty minutes to provide a tough, durable and semi-gloss coating. It can be applied to both primed and unprimed surfaces as well as cleaned and degreased steel. For optimum durability primed steel is recommended.

## Twin Pack

### Isocyanate Free Gloss Paint

This two part product has extremely high levels of gloss and toughness and offers exceptional weather resistance. Less harmful to the environment the paint is designed to be oven baked for best results for OEM use and many other shot blasted metal surfaces. It provides excellent longevity of finish.

### Polyurethane Enamel Gloss Paint

This two part product is designed where a high gloss and high chemical resistance is required, such as lorry cabs, vans and other industrial equipment. It offers exceptional weather resistance and can be applied by either brush or roller.

## Chlorinated & Acrylated Rubber Coatings

### Chlorinated Rubber Paint

An air drying, single pack system resistant to a wide range of chemicals, including acids, alkalis, oxidising agents, inorganic salts, moist gases, sewage and mineral oil. It is ideally suited for application to brickwork, slate roofs, steel, chemical storage tanks, bridges, marine equipment, swimming pool surrounding walls, floors and ceilings, sewage tanks etc. Ideal for veterinary clinics, milking parlours, stables, kennels and catteries and can be used in ornamental ponds and pond features.

### Acrylated Rubber Paint

A fast drying, single pack finish, which has mild resistance to a wide range of chemicals. Suitable for use in damp or moist environments, is ideally suited for application to pool halls on moisture resistant surfaces. Recommended for a huge variety of commercial and industry uses including marine environments and boats. BS4800 & RAL colours. Only available in batches of 300 litres or more.

# Industrial Undercoats & Primers

Applying the correct primer or undercoat is crucial to ensure good adhesion and long lasting protection for the finished coating. Our range of industrial undercoats and primers come with extensive options such as quick drying, zinc free and water based products for a whole range of metal applications.

## Supercote Primer Undercoat

The ideal, all round primer and undercoat specifically designed for use with our Supercote Enamel Gloss top coat. Suitable for use on ferrous metal, and many other surfaces.

## Zinc Phosphate EC Primer

An extremely quick-drying, anti-corrosive primer which is designed specifically for structural steelwork applications. Available in red oxide, grey and buff colours.

## 90% Zinc Rich Primer

An extremely heavy duty, anti-corrosive coating, which is ideal for extending the life of steelwork. A form of cold galvanising, this product has been awarded "Best Buy" in Practical Classics magazine.

## Zinc Phosphate Primer QD HB

This is a premium quality, anti-corrosive and quick drying primer, which gives a strong matt finish on metal surfaces. Available in red oxide, grey and buff colours.

## Oxide Primer

A quick drying, heavy duty primer which is available in red oxide and grey colours.

## Water Based Blast Primer

This water based primer is a low odour product and is for use on mechanically or blast cleaned steel. With rapid drying and re-coating time this is a very popular and reliable primer with excellent resistance to abrasion, impact, rust and water.

## Quick Drying Eggshell Finish Primer

A rapid drying, eggshell primer which is designed for the longer term protection of steelwork. The product offers a very strong bond between the primer and the metal surface and is ideal for use with our Quick Drying Polyurethane Gloss top coat.

## Quick Drying Eggshell Finish Primer - Zinc Free

All the benefits of our water based blast primer - without the zinc. Quick drying and excellent resistance to abrasion impact, rust and water.

### Etch Primer - Single Pack

This etch primer is designed specifically for adhesion to steelwork with an extremely smooth surface, also hard to coat surfaces such as galvanised steel and aluminium.

### Etch Primer - Twin Pack

This etch primer is designed specifically for adhesion to steelwork with an extremely smooth surface, also hard to coat surfaces such as galvanised steel and aluminium.

### Epoxy Zinc Phosphate Fast Cure Sheen Primer

A twin pack non-toxic Primer which can also be used as a blast primer, full coat and over the other twin pack primers. This products should be used on blast cleaned steel or steel which is clean and free from scale or rust. Available in White, Red, Grey or Buff.

### Twin Pack High Solids Epoxy Primer

A twin pack anti corrosive primer used on blast cleaned steel or on steel which is clean and free from scale and rust. It is especially suitable where gloss hold up of the top coat is required. Available in White, Red, Grey or Buff.

### Epoxy High Build Undercoat

This product is designed for maximum protection with the minimum number of coats. It can be applied directly to blast cleaned and primed metals. With outstanding chemical and abrasion resistance, this undercoat is recommended on steel structures exposed to highly corrosive environments.

### Acrylic Bond Primer

A water based "rust convertor" primer which is used on the most corroded steel work to bond rust back to steel.

### Polyurethane Undercoat

This product has exceptional chemical, solvent and weather resistant qualities. Easy to apply.

### Acrylated Rubber Zinc Phosphate Undercoat

A primer designed for use on blast cleaned steel or blast cleaned zinc sprayed steel and for use under an acrylated rubber top coat. The complete system provides excellent protection under severe conditions.

### T-Wash Mordant Solution

A specially formulated acid based solution for the pre-treatment coating of new galvanised surfaces prior to application of standard paint system. This product ensures excellent paint adhesion to the surface.

# Woodcare & Joinery Coatings

Providing the very best in professional wood care, our unique range of products is designed to enhance and protect the beautiful appearance of wood, for both internal and external use. The products we make for external use are typically used on windows, doors and conservatories, outbuildings, fencing, gates, stairs, decking doors and garden furniture and many other outdoor structures. We are proud to supply direct to manufacturers of these products or individual customers looking to enhance their business or personal property.

## Water Based Top Coat

Our outstanding top coat gives a high sheen and protective coating and provides excellent overall weather resistance. It can be used on both interior and exterior woodwork and is based on a unique high quality acrylic dispersion, which gives an unbeatable finish. This popular and reliable top coat is ideal for window frames and doors, conservatories, cladding and outbuildings.

## Water Based Universal Preserver

This is a Barretine Product that we highly recommend and is used as the first step in the preparation of wood restoration and decorating. A water based quick drying treatment for both wet rot, dry rot, wood boring insects. A very low odour formulation which is ideally suited for enclosed and external use prior to coating with paint, varnish or sealer. It is compatible with our Stain Blocking Primer and outstanding top coat listed below.

## Water Based Stain Blocking Primer

A highly effective, lead free, water based stain blocker which is designed for both interior and exterior woodwork. Easy to apply this product is designed to tackle those difficult to coat woods such as oak and cedar. It dries rapidly to form a smooth film which helps towards a top quality finish. This product can also be used as a first class base coat for most decorative finishes.

## Woodcote Exterior Wood Stain

This is an oil based, high solids, easy to apply, excellent exterior wood treatment. This wood stain comes in a choice of transparent or 19 different colours to help enhance woodwork of many types.

## Timberlast Exterior Wood Treatment

A high quality wood treatment available in a range of colours. It can be used on sheds, fences and timber products where decorative colour and chemical protection are of the utmost importance. An excellent water repellent, this product provides long lasting colour and wood protection and deep penetrates the wood to prevent rot and mould.

## Creobit Wood Preservative

A creosote and black bituminous based wood preservative. Ideal for pasture and typically horse fencing. Black in colour.

# CREOCOTE

## WOOD TREATMENT

### Oil Based Exterior Wood Treatment

Available in "Nut Brown"  
Dark shade, this creosote substitute is ideally suited to rough woods on sheds, fences and barns and provides excellent surface water repellency and so restricts weather damage.

#### PACK SIZES

Available in 4 and 20 Litres

# Floor & Line Marking Paints

At Witham we specialise in floor paints and appreciate the importance of maintaining the smart appearance of your floors whatever they are made of. We provide highly reliable products for a wide variety of applications: workshop floors to veterinary clinics, showrooms to dairies, race tracks to tennis courts and factory floors to parking bays to name a few.

## PROFESSIONAL FLOOR PAINTS

Our **Koverflor range** of Floor paints and line marking paints are manufactured to aid cleaning, resist marking and stains and provide attractive long lasting finishes to hard worked areas. Available in a variety of popular colours our paints are easily applied giving a robust and hard wearing finish. Whichever product you choose you can rest assured that you are investing in a quality product that will provide the long lasting results.

COLOUR RANGE      

## Single Pack

### Koverflor Polyurethane Floor Paint

A polyurethane based, quick drying, single pack oil and petrol resisting paint. Ideal for use on clean, dry mature concrete, brickwork, quarry tiles, stone, wood and linoleum. It gives a tough abrasion resistance finish and reliable on surfaces that are subject to hard wear. Using this product can also prevent a cement floor from 'dusting up'. It is recommended for many uses but especially used in offices, corridors, show rooms and high pedestrian traffic areas.

### Koverflor Chlorinated Rubber Floor Paint

A rubber based floor paint for use on strongly alkaline surfaces, such as new concrete or where a high degree of chemical resistance is required. This product is ideal for use in chemical plants, water works, sewage installation, milking parlours, canteens, dairies and workshops, where resistance to chemicals, urine, acids, petrol and lubricating oils is important. An extremely robust paint, this is also ideal for agricultural uses, stables, kennels and catteries.

## Twin Pack

### Koverflor Epoxy Floor Paint

Gives an outstanding hardness and abrasion resistant coating. Designed to be resistant to a wide range of chemicals, detergents, minerals, vegetable oils and the large majority of solvents. Can be used on new and mature concrete, quarry tiles and paving stones. A heavy duty coating resistant to heavy traffic.

### Epoxy Water Based Floor Paint

A hard wearing, water based, solvent free two pack floor coating for use in areas of heavy traffic. I.e. fork lift trucks and vans. It contains no organic solvents and has only a low odour with no surface tackiness. This product can be applied to damp substrates and offers an extremely high level of abrasion resistance. It is also tolerant to aggressive cleaning methods and provides extremely good chemical resistance. Available in Eggshell or semi-gloss.

## Line Marking & Safety Identification Paints

### Chlorinated Rubber Based Line Marking Paint

Designed for concrete surfaces only. This is extremely quick drying. Excellent to mark out hazards, roadways, parking bays, etc.

### Multi-Purpose Water Based Marking Paint

For use as an economical multi-purpose line marking and identification paint. Suitable for use on concrete and block work paving. Available in white only.

## Decorative Paints

There is no limit to what colour you can choose and how you can decorate the inside or outside of your home or business these days. Paint is personal and yet can help create the right mood and setting for work, home or leisure environments. Keeping up appearances is important and a lick of good paint can help transform a house into a home or a shop or business into somewhere that customers will want to visit. That is why we think it is important to be able to offer a choice of decorative paint products from right across the market place, along with all the tools and equipment to help you create the look, quality finish and ambience you wish to achieve.

### Quality Manufacturers

We manufacture our own decorative paints but also stock paints and products from Crown, Sadolin, Sandtex, Hammerite and Permoglaze. Also available are all the painting and preparation tools and equipment to ensure we always have what you need, depending on your budget and the task in hand.

### Brushstroke Emulsion

A high quality, multi-purpose contract emulsion for interior use. White and Magnolia are standard and other colours are easily made to order.

### Exterior Masonry Finish - High Build

Is a premium quality, pliolite solvent-based paint formulated for exterior use on cement rendering, rough cast, brick and concrete. It provides a smooth matt finish that has excellent adhesion to previously painted and suitably sealed surfaces. The pliolite resin provides a strong protection against severe weather conditions and erosion.

### Exterior Eggshell Masonry Finish

A tough, durable coating that allows the substrate to breathe. The coating exhibits a high degree of resistance to washing and alkali.

We also offer a free paint colour matching service which gives you the chance to create the exact colour you are looking for without extra cost. With technical support all the way our speedy delivery service will also make sure to don't have to wait long to get started.

# MARINE & ANTI-FOULING PAINTS

By using our boat paint solutions, including anti-fouling, boat primers, yacht varnish and more, we can not only help protect your boat, but also the environment. Whether it's your weekend pride and joy or industrial fishing and cargo ships, we have tried and tested reliable products for every application. Top coats and glosses are designed to provide an enhanced cosmetic finish to the boat and provide a protective barrier against the elements that will attack the surface of the vessel.

## Single Pack Paint & Varnish

### Marine Gloss

A high gloss finish for application to superstructures, topsides, masts and deck fittings. Non yellowing and highly resistant to sunlight and salt spray this paint can also be used for the interior of the craft.

### Marine Undercoat

Designed for use on primed surfaces of metal, aluminium or wood, this is the ideal undercoat for Marine Gloss topcoat.

### Non Slip Deck Paint

An alkyd based deck paint suitable for hard wearing areas and is most resistant to salt water and fuel spillages. This paint is recommended for commercial fishing boats and recreational vessels where a quality non slip coating is required.

### Traditional Yacht Varnish

A flexible clear wood varnish with UV filtration properties. Heritage approved this varnish is suitable for a whole range of wooden marine applications.

### Bilge Paint

This is a super chemical resistant alkyd gloss paint for use on both commercial and pleasure craft vessels. It can also be used for lockers and bulk heads.

### Metallic Barrier Primer

Metallic Barrier Primer is based on a modified Chlorinated rubber binder for use on wood and steel. It is suitable as an underwater primer over prepared steel and a barrier coat under Anti fouling systems.

### Vinyl Pitch Coating

A highly acidic and alkali resistant paint which in combination with coal tar pitch gives an extremely high build film.

## Twin Pack Paint & Varnish

### Polyurethane Enamel

A twin pack premium quality, high gloss coating. This product is extremely tough and durable and has excellent gloss retention properties and is ideal for use on all marine vessels.

### Polyurethane Undercoat

A highly durable undercoat designed to go with the above Enamel top coat.

### Non Slip Alkyd Deck Paint

This heavy duty paint gives outstanding hardness and abrasion resistance and is designed for use where heavy traffic, chemicals, detergents and many other solvents are used.

## Anti-Fouling Paints

### Universal Anti Fouling Paint

Our Universal Anti fouling paint is based on a modified composition containing a high level of copper thiocyanate which provides good antifouling properties. Suitable for domestic and commercial vessels with aluminium, steel, wood or GRP hulls. This product can be used on vessels that will be immersed in salt or freshwater. Available in White, Black, Blue and Red.

### Traditional Antifouling Paint

Designed for vessels with a maximum speed of 25-30 knots this economical protection is suitable for domestic and commercial vessels with steel, wood or GRP hulls and for use in either salt or freshwater. It contains a high level of copper oxide to achieve good antifouling properties. It is recommended that our Metallic Barrier primer is used underneath this product. Available in Red, Black, Green, Blue or Light Grey.

# Specialist Paints & Coatings

Sometimes you need very specialist paints for particular applications and finishes. We provide a whole range of unusual and more specific paints from swimming pools to heat resistant paints, hammer finish to anti-condensation coatings, model paints to anti-vandal coatings. Please get in touch to see how our specialist range can help you.

## Swimming Pool Paint - Type A

A chlorinated rubber non-breathable paint. Formulated for use in concrete swimming pools with a built in waterproof membrane. It is designed to dry to a satin gloss finish. Designed specifically to be hand brush applied. This product is extremely durable & chemically resistant.

## Swimming Pool Paint - Type B

A chlorinated rubber breathable paint. Designed for use on swimming pools without a built in membrane. It dries quickly to a matt finish and is best applied by hand brush. It can be applied over previously painted surfaces where a known chlorinated rubber coating has been used. This product is extremely durable and chemically resistant.

## Swimming Pool Paint - Type C - Water Based

A universal swimming pool paint. Suitable for use on concrete swimming pools with or without built in membranes. It can be brushed or rolled to produce a pleasing matt finish.

## Swimming Pool Sealer

Chlorinated rubber based sealer. Suitable for the initial priming of rendered pool walls.

## Model Paint

An oil based enamel designed for excellent adhesion onto injection moulded plastic. Available in military and historic colours for the modeller.

## Brillite Fluorescent Paint

This high reflective "day glow" paint is designed specifically for safety rails, steel, primed wood, or aluminium substrates that require striking fluorescent colour for identification purposes.

## High Temperature Resistance Enamel Paint

A 120°C heat resistant enamel. To be applied directly onto radiators, pipes and flues. Limited range of colours.

## Very High Temperature Resistance Enamel Paint

A 300°C heat resistant enamel gloss. To be applied directly onto surfaces requiring extreme protection against heat.

### Very High Temperature Resistance Aluminium Paint

An industrial finish coating, which gives a decorative hammered effect. For use on primed steel and aluminium surfaces this is available in a range of primary colours.

### Hammer Finish

An industrial finish coating, which gives a decorative hammered effect. For use on primed steel and aluminium surfaces this is available in a range of primary colours.

### Plastic Primer

A quick drying primer based on an acrylic resin system. Suitable on a wide variety of substrates. Provides excellent key to top coats.

### Anti-Thief & Vandal Paint

A unique material that provides a semi dry plastic coating to unpainted and painted surfaces including metal & plastic sills, drain pipes, concrete bricks, woodwork and roofing materials.

### Anti Condensation Paint

Designed for use where condensation can be a problem. Suitable for catering establishments, food processing plants, electrical switch rooms and general enclosed areas with limited ventilation.

# Equestrian Paint

## RANGE

Designed to enhance the longevity, appearance and protection of all interior and exterior finishes for the horse racing, livery and equine industry. We understand that the breeding, training and general welfare of horses and other animals is of paramount importance and so our range of products caters for all budgets and all requirements.

### Masonry Paint

To cover exterior and interior blockwork, brickwork or render.

### Specialist Floor Paints

Chorinated Rubber Paint which is highly robust and resistant to urine acids, and other chemicals. Allows easy cleaning whilst maintaining a high level finish. Also ideal for workshop floors, catteries and kennels.

### Woodcare and Preservatives

Designed to enhance and protect the natural appearance of wood. Our specialist preservatives, woodstains and top coat treatments, ensure colour and chemical protection sit hand in hand whilst preventing rot and mould.

### Top Coats and Decorative Finishes

For use on:

- Stable Blocks
- Gates, Fencing and Railings
- Posts and Signage
- Jumps, Menages, Carriages
- Tack Rooms and Outbuildings
- Hay Racks and Ironmongery
- Houses and Offices

# CREOCOTE

## WOOD TREATMENT

## Oil Based Exterior Wood Treatment

Available in "Nut Brown"  
Dark shade, this creosote substitute is ideally suited to rough woods on sheds, fences and barns and provides excellent surface water repellency and so restricts weather damage.

### PACK SIZES

Available in 4 and 20 Litres

# For the Perfect Finish

## Paint Brushes

From top quality brushes for decorating experts to everyday use or even disposable sets, our wide range of paint brushes are available from a variety of suppliers in a whole range of shapes and sizes and to suit every budget.

*Top quality paint brush suppliers include Hamilton and Purdy Brushes.*

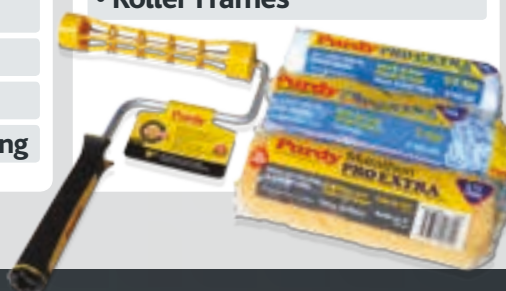

## Preparation & Cleaning

- Wire Brushes
- Shave Hooks
- Stanley Knives
- Filling and Stripping Knives
- Sandpaper and Wire Wool
- Interior and Exterior Fillers
- Masking Tapes
- Paint Stripper
- Hand Sanders
- Hand Cleaning Products
- Protective Masks and Clothing

## Paint Rollers

All designed with speed and coverage in mind, our rollers are made of a variety of materials relevant to a wide range of applications.

- Roller Brushes
- Roller Trays
- Roller Frames

## Paint Thinners

- TDS TH1 White Spirit Based Thinners
- TDS TH2 Xylene Based Thinners
- TDS TH4 2 Pack Epoxy Thinners
- TDS TH6 2 Pack Polyurethane Thinners
- TDS TH12 Etch & Manila Thinners
- TDS TH25 Supercote Thinners
- TDS TH30 Slow Drying Thinners
- TDS TH44 Isocyanate Free Thinners

**Gunwash Thinners**  
For the cleaning of spray, brush and roller equipment only

# Helpful Hints and Advice to Ensure 'The Perfect Finish'

## ⚠ Preparation is Key

Preparation is key and it's your reputation that's at stake if you do not take the time and care to prepare properly. No matter how skilled you are at your trade, if you don't use the right tools or the right quality product, don't clean the surface that you want to paint sufficiently, you won't get the best finish despite your best efforts.

The actual preparation required varies according to the surface to be painted, its age, type and condition but note that preparation is the key to a successful outcome of any decorating task and it may well take longer than the painting of the area itself.

**We are here to help anytime with your questions and so please feel free to call: 01522 521192**

## ⚠ Before You Start

- ✓ Ensure you have selected the **correct paint or coating** for your chosen project.
- ✓ Make sure you understand how the paint system needs to work (**twin pack paints etc**).
- ✓ **Work out the area to be covered** and the **number of coats to be applied**.
- ✓ Ensure you **wear recommended protective clothing**, spray mask and goggles.
- ✓ **Ensure there is plenty of ventilation** adequate for the application.
- ✓ On metal work ensure you **choose the right abrasive** when shot blasting is not an option.
- ✓ All surfaces, whatever the type **need to be free from dirt, grease** and other surface contamination. **Always use the correct degreaser or panel wipe**.
- ✓ Always **read the Technical Data Sheets** and **Health & Safety Sheets** before using any product.
- ✓ **Ensure all surfaces are properly prepared** before painting, **free of dirt, dust, wax, polish or grease**.
- ✓ **Stir paint cans thoroughly and shake spray cans vigorously** for about one minute after the ball is heard.
- ✓ Spray the object at about 30cm (12"). **Move the spray can parallel with the surface**, back and forth **to ensure a smooth and even coverage**.
- ✓ **Check the room temperature for spraying** is not below 50°F (10°C).
- ✓ **Apply thin coats**, if paints sags or runs you are too close or applying the paint too heavily.
- ✓ **Ensure the appropriate drying time is allowed** before applying subsequent coats or using the application.

## ⚠ Aftercare

- ✓ **In the middle of a painting project and want to keep your brushes fresh overnight?** In this case, there's no need to give them a thorough clean. Simply wrap the head of your paint brushes and roller in cling film or secure in an airtight plastic bag. **Seal around the handle with masking tape and store in a dry place for up to two days.**
- ✓ Once you've finished painting, it's now time to give your brushes and rollers a proper clean. First, **scrape off as much paint as you can.**
- ✓ If you've been using water-based paint, **simply soak your brush or roller in warm water for about 2 hours.** Dry with a clean cloth and store in a dry place for future use.
- ✓ **Using solvent-based paints?** Pour a small amount of solvent-based cleaner (this can be found at your local hardware store) into a small jar or container and work the brush against the sides to get the cleaner into the base of the bristles. **Soak for about 2 hours, dry with a clean cloth and store in a dry place for future use.**
- ✓ You shouldn't pour solvents down the sink, after you've finished cleaning your brushes, place a lid on your jar or container and leave for 24 hours. **Once the paint has sunk to the bottom, you can tip the remaining solvent cleaner into the bottle for future use.** Leave the paint to fully dry in the jar before disposing in the bin. **Try to use as small a jar or container as possible to keep the solvent use to a minimum.**

## ⚠ Cleaning and Disposal of Paint

### ✓ Remember - Clean up responsibly!

If you do end up with leftover paint, can you re-use it? Storing leftover paint is easy as long as you keep the tins away from direct sunlight and in a frost-free environment. If you only have a small amount remaining, pour the leftover paint into old jam jars and store in a safe, dry place.

**Leftover whites? Mix them together and use as a base coat next time you decorate.**

### Can someone else use it?

You could pass it on to neighbours or friends, or perhaps a local theatre group, school or community centre could use it. Community repaint projects, such as Community Repaint, is also a great option. Coordinated by the not-for-profit environmental consultancy Resource Futures, Community Repaint collects 'half-tins' of leftover paint from donation points at numerous Local Authorities' Household Waste Recycling Centres and Civic Amenity sites. **To donate paint, simply visit: [www.communityrepaint.org.uk](http://www.communityrepaint.org.uk) to find your nearest Paint Donation Facility.**

**Do not pour leftover paint or varnish in to drains or watercourses.**

**Remove excess material from brushes and rollers** by wiping off onto newspaper or rag and spread out to dry before disposal. **Use an inert, absorbent material (such as cat litter) to soak up small amounts of water based coatings** – then dispose of in a dustbin.

If leftover product is stored carefully it can often be re-used. Keep the lid firmly on the can to ensure a good seal. **Protect water based coatings from freezing and all coatings from temperatures above 35°C.**

### Commercial Users

**For larger amounts ask your local authority for guidance.** Some local authorities have separate facilities for coatings and recycling of empty or dried out cans as many do not want coating waste in the dustbin. They should be able to direct you to a special facility for disposing of paint without harming the environment.

**Remember** that when disposed of as waste, paints and varnishes can create problems for landfill sites if not mixed in with other rubbish and due to their messy nature, they can contaminate recycling schemes.

# The Quality Lubricant

For over 95 years we have also manufactured and distributed industrial and commercial lubricants and grease products. Originally making cycle oils and candles since 1921, we have grown and developed our business to be able to offer a huge range of modern products made from our own blending plant in Lincolnshire.

Our products are delivered to an enormous variety of customers. Specialising in agriculture, automotive, haulage and marine industries, we also supply other markets such as engineering companies, plant machinery, international race circuits and pipework producers, all with reputable products that can be relied on year after year.

## Quality Lubricants

Qualube is the Brand name for our range of quality lubricants, oils and greases. Made from the highest quality raw materials, Qualube lubricants offer an extensive range of specific products for specific industry uses. All our products meet the latest and highest Original Equipment Manufacturers approved requirements. Whether used in engines, hydraulic equipment, horticultural applications or general transmissions, they are designed to advance both the performance of the machinery as well as reduce the emissions, maintenance, and wear and tear of the working parts. Driving further efficiencies

in fuel economy our technical teams work hard in their laboratories to ensure the latest technologies maximise results whatever the application. In addition we strive to develop products that are biodegradable or more environmentally friendly with the same high level of performance and reliability. As a family business, our independence gives us the refreshingly personal and long term approach to customers and our service and flexibility on deliveries and order times are second to none.

### Lubrication Surveys

To ensure the right lubrication product is used in the right vehicle or application, we can undertake free bespoke lubrication surveys for each customer. This could be on a large vehicle fleet or on individual items of machinery and equipment. A copy of this itemised report is then kept by us for future technical support and advice, and also by the customer. The survey is presented in an easy to refer to file so that all the engine and lubricant descriptions are in one place for future use.

### Bulk Storage Tanks

As part of our service, we can supply a range of specialist bulk storage tanks for workshops and outbuildings. Our lorries top up the colour coded tanks as required, which are clearly labelled for different products and uses. Customers find this unique service indispensable in helping with health and safety requirements and maintaining a ship shape environment for staff and day to day operations.

### Own Label Products

For many years now we have been able to offer a specialised "Own Label" packaging and labelling service for customers who wish to sell their own brand of oils and lubricants. Using our in house graphics and design team or working in partnership with the customers, we can help businesses and distributors market their own products which have the quality manufactured Witham product behind them.

### Hallmark of Quality

We are proud to be accredited with the British Standard EN ISO 9001:2008. This ensures our entire manufacturing and distribution processes meet the highest standards and provides assurance that the way we do business is recognised as good practice. We strive to ensure the customer is at the heart of every business decision we make and ensure our prices are competitive and products of the highest quality. For more information about how we can supply all your oil and paint needs under one roof, have a look at our website: [www.withamgroup.co.uk](http://www.withamgroup.co.uk) or call us today.

## Our Lubricant Range

We manufacture and supply a whole range of quality and award winning Lubricants and greases:

Engine Lubricants

Agricultural Lubricants

Passenger Car Motor Oils

Hydraulic Lubricants

Gear Oils & Transmission Lubricants

Classic Lubricants

Grease Range

Environmentally Friendly Lubricants

Horticultural Lubricants

Antifreeze Range

Ancillary Products
